Understanding Hieroglyphs

Describes the grammar, pronunciation, and writing of words and sentences in hieroglyphs.

First Steps in Egyptian

“Man perishes; his corpse turns to dust; all his relatives pass away. But writings make him remembered” In ancient Egypt, words had magical power. Inscribed on tombs and temple walls, coffins and statues, or inked onto papyri, hieroglyphs give us a unique insight into the life of the Egyptian mind. Egyptologist Toby Wilkinson has freshly translated a rich and diverse range of ancient Egyptian writings into modern English, including tales of shipwreck and wonder, obelisk inscriptions, mortuary spells, funeral hymns, songs, satires and advice on life from a pharaoh to his son. Spanning over two millennia, this is the essential guide to a complex, sophisticated culture. Translated with an Introduction by Toby Wilkinson

Decoding Egyptian Hieroglyphs

“An entertaining and informative romp, from the joys of imported beer to the horror of invasion . . . demonstrates the extent of Egyptian foreign affairs.”—Ancient Egypt Magazine The ancient Egyptians presented themselves as superior to all other people in the world; on temple walls, the pharaoh is shown smiting foreign enemies—people from Nubia, Libya and the Levant or crushing them beneath his chariot. But despite such imagery, from the beginning of their history, the Egyptians also enjoyed friendly relations with neighboring cultures; both Egyptians and foreigners crossed the deserts and seas exchanging goods gathered from across the known world. War & Trade with the Pharaohs explores Egypt’s connections with the wider world over the course of 3,000 years, introducing readers to ancient diplomacy, travel, trade, warfare, domination, and immigration—both Egyptians living abroad and foreigners living in Egypt. It covers military campaigns and trade in periods of strength—including such important events as the Battle of Qadesh under Ramesses II and Hatshepsut’s trading mission to the mysterious land of Punt—and Egypt’s foreign relations during times of political weakness, when foreign dynasties ruled parts of the country. From early interactions with traders on desolate desert tracks, to sunken Mediterranean trading vessels, the Nubian Kingdom of Kerma, Nile fortresses, the Sea Peoples, and Persian satraps, there is always a rich story to tell behind Egypt’s foreign relations. “Garry Shaw’s book is something of a revelation, a different way of looking at what we know about the Ancient Egyptians and their amazing culture.”—Books Monthly “As inherently fascinating a read as it is exceptionally well researched, written, organized and presented.”—Midwest Book Review

Egyptian Hieroglyphs for Everyone

This brief guide was prepared for those inquiring about how to enter into Hieroglyphic studies on their own at home or in study groups. First of all you should know that there are a few institutions around the world which teach how to read the Hieroglyphic text but due to the nature of the study there are perhaps only a handful of people who can read fluently. It is possible for anyone with average intelligence to achieve a high level of proficiency in reading inscriptions on temples and artifacts; however, reading extensive texts is another issue entirely. However, this introduction will give you entry into those texts if assisted by dictionaries and other aids. Most Egyptologists have a basic knowledge and keep dictionaries and notes handy when it comes to dealing with more difficult texts. Medtu Neter or the Ancient
Egyptian hieroglyphic language has been considered as a "Dead Language." However, dead languages have always been studied by individuals who for the most part have taught themselves through various means. This book will discuss those means and how to use them most efficiently.

**Easy Lessons in Egyptian Hieroglyphics with Sign List**

This book is written for high school students and beginners. It avoids using complicated grammar. The examples are kept simple. In many cases the hieroglyphs are "unrolled" - each hieroglyphic word is presented to the student one hieroglyph at a time, just as we write an English word one letter at a time. Each hieroglyph is treated as if it were a letter. This makes it much easier for the beginning student.

Volume 1 consists of a series of simple lessons which when completed will enable the student to read many simple hieroglyphic sentences and significant parts of more complex sentences. The grammar presented is "Middle Egyptian" which is the most common version taught. It is not necessary to have previously studied any other foreign language. In many ways, learning ancient Egyptian will be easier for the student who has never studied a foreign language before.

The Hieroglyphic Dictionary is part of Museum Tours' series "The Essentials" books that anyone serious about the study of Egyptology will find useful. It has been created to fill a need for a low cost, yet comprehensive, translation aid to hieroglyphs that is convenient to use. Its emphasis is on words found in monumental inscriptions, as opposed to words found strictly in papyri. The words it contains are most likely to be encountered on the monuments in Egypt or in museums. It contains about 4,000 entries. This compares favorably to the 2,500 entries in the vocabulary of Alan Gardiner's "Egyptian Grammar", and the 5,000 plus entries in Raymond Faulkner's "Dictionary of Middle Egyptian". The volume's convenient size makes it ideal for everyday use anywhere one happens to be, a local museum or the monuments in Egypt. It is a "must have" for any serious student, Egyptologist or Egyptophile. From Museum Tours Press.

Ancient Egyptian Hieroglyphs

An easy to use dictionary containing over 8,000 entries designed for the beginning student. An excellent companion to the author's "How To Read Egyptian Hieroglyphs - For High School Students." The Egyptian hieroglyphic "alphabet" is printed at the front of the book. The hieroglyphs are arranged in hieroglyphic order using Gardiner's familiar "A to Z" arrangement. MDCs and transliterations are intentionally left out since they tend to make it much more difficult for the beginning student to learn. An eBook version for the Kindle is also available.

It contains twenty-six lessons, exercises (with answers), a list of hieroglyphic signs, and a dictionary. It also includes a series of twenty-five essays on the most important aspects of ancient Egyptian history, society, religion and literature. The combination of grammar lessons and cultural essays allows users to not only read hieroglyphic texts but also to understand them, providing readers with the foundation to understand texts on monuments and to read great works of ancient Egyptian literature in the original text. This second edition contains revised exercises and essays, providing an up to date account of current research and discoveries. New illustrations enhance discussions and examples. These additions combine with the previous edition to create a complete grammatical description of the classical language of ancient Egypt for specialists in linguistics and other fields.

In Ancient Egyptian Phonology, James Allen studies the sounds of the language spoken by the ancient Egyptians through application of the most recent methodological advances for phonological reconstruction. Using the internal evidence of the language, he proceeds from individual vowels and consonants to the sound of actual ancient Egyptian texts. Allen also explores variants, alternants, and the development of sound in texts, and touches on external evidence from Afroasiatic cognate languages. The most up to date work on this topic, Ancient Egyptian Phonology is an essential resource for Egyptologists and will also be of interest to scholars and linguists of African and Semitic languages.

Egyptian Hieroglyphs

In 1799 Napoleon's army uncovered an ancient stele in the Nile delta. Its inscription, recorded in three distinct scripts--ancient Greek, Coptic, and hieroglyphic--would provide scholars with the first clues to unlocking the secrets of Egyptian hieroglyphs, a language lost for nearly two millennia. More than twenty years later a remarkably gifted Frenchman named Jean-Francois Champollion successfully deciphered the hieroglyphs on the stele, now commonly known as the Rosetta Stone, sparking a revolution in our knowledge of ancient Egypt. Cracking the Egyptian Code is the first biography in English of Champollion, widely regarded as the founder of Egyptology. Andrew Robinson meticulously reconstructs how Champollion cracked the code of the hieroglyphic script, describing how Champollion started with Egyptian obelisks in Rome and papyri in European collections, sailed the Nile for a year, studied the tombs in the Valley of the Kings (a name he first coined), and carefully compared the three scripts on the Rosetta Stone to penetrate the mystery of the hieroglyphic text. Robinson also brings to life the rivalry between Champollion and the English scientist Thomas Young, who claimed credit for launching the decipherment, which Champollion hotly denied. There is much more to Champollion's life than the Rosetta Stone and Robinson gives equal weight to the many roles he played in his tragically brief life, from a teenage professor in Revolutionary France to a supporter of Napoleon (whom he met), an exile, and a curator at the Louvre. Extensively illustrated in color and black-and-white pictures, Cracking the Egyptian Code will appeal to a wide readership interested in Egypt, decipherment and code-breaking, and Napoleon and the French Revolution.

Ancient Egyptian Calligraphy

Throughout the pharaonic period, hieroglyphs served both practical and aesthetic purposes. Carved on stelae, statues, and temple walls, hieroglyphic inscriptions were one of the most prominent and distinctive features of ancient Egyptian visual culture. For both the literate minority of Egyptians and the vast illiterate majority of the population, hieroglyphs possessed a potent symbolic value that went beyond their capacity to render language visible. For nearly three thousand years, the hieroglyphic script remained closely bound to indigenous notions of religious and cultural identity. By the late antique period, literacy in hieroglyphs had been almost entirely lost. However, the monumental temples and tombs that marked the Egyptian landscape, together with the hieroglyphic inscriptions that adorned them, still stood as inescapable reminders that Christianity was a relatively new arrival to the ancient land of the pharaohs. In Egyptian Hieroglyphs in the Late Antique Imagination, Jennifer Westerfeld argues that depictions of hieroglyphic inscriptions in late antique Christian texts reflect the authors' attitudes toward Egypt's pharaonic past. Whether hieroglyphs were condemned as idolatrous images or valued as a source of mystical knowledge, control over the representation and interpretation of hieroglyphic texts constituted an important source of Christian authority. Westerfeld examines the ways in which hieroglyphs are deployed in the works of Eusebius and Augustine, to debate biblical chronology; in Greek, Roman, and patristic sources, to claim that hieroglyphs encoded the mysteries of the Egyptian priesthood; and in a polemical sermon by the fifth-century monastic leader Shenoute of Atripe, to argue that hieroglyphs should be destroyed lest they promote a return to idolatry. She argues that, in the absence of any genuine understanding of hieroglyphic writing, late antique Christian authors were able to take this powerful symbol of Egyptian identity and manipulate it to serve their particular theological and ideological ends.

Ancient Egyptian Phonology

Ancient Egyptian
This is a practical, modern introductory grammar for classroom and self-instruction. Unlike Alan Gardiner's monumental Egyptian Grammar, this is not intended as a reference work, and it is designed to be as user-friendly as possible by, for example, presenting simplified forms of genuine texts rather than diving straight into the originals. It is suggested the 16 lessons be spread over about 30 weeks study. The book is widely used in North American courses.

Reading the Past

The dearth of suitable introductory texts presents a serious obstacle to the study of the Egyptian language, so this practical grammar answers a longstanding need. Its well-known and highly respected author, a Keeper of the Egyptian and Assyrian Antiquities at the British Museum, has written many other popular Dover books on Egyptology. Contents include lists of frequently used signs and determinatives, a short vocabulary of about 500 words, a series of 31 texts and extracts (with interlinear transliteration and word-for-word translation), and a few untransliterated and untranslated texts (with glossary), to be worked out independently. This is a valuable book for archaeologists, anthropologists, and anyone with a professional or amateur interest in Ancient Egypt.

First Steps in Egyptian Hieroglyphics

A major new history of the race between two geniuses to decipher ancient Egyptian hieroglyphs, set against the backdrop of nineteenth-century Europe. In 1799, a French Army officer was rebuilding the defenses of a fort on the banks of the Nile when he discovered an ancient stele fragment bearing a decree inscribed in three different scripts. So begins one of the most familiar tales in Egyptology—that of the Rosetta Stone and the decipherment of Egyptian hieroglyphs. This book draws on fresh archival evidence to provide a major new account of how the English polymath Thomas Young and the French philologist Jean-François Champollion vied to be the first to solve the riddle of the Rosetta. Jed Buchwald and Diane Greco Josefowicz bring to life a bygone age of intellectual adventure. Much more than a
decoding exercise centered on a single artifact, the race to decipher the Rosetta Stone reflected broader disputes about language, historical evidence, biblical truth, and the value of classical learning. Buchwald and Josefowicz paint compelling portraits of Young and Champollion, two gifted intellects with altogether different motivations. Young disdained Egyptian culture and saw Egyptian writing as a means to greater knowledge about Greco-Roman antiquity. Champollion, swept up in the political chaos of Restoration France and fiercely opposed to the scholars aligned with throne and altar, admired ancient Egypt and was prepared to upend conventional wisdom to solve the mystery of the hieroglyphs. Taking readers from the hushed lecture rooms of the Institut de France to the windswept monuments of the Valley of the Kings, The Riddle of the Rosetta reveals the untold story behind one of the nineteenth century’s most thrilling discoveries.

The language that is today called Egyptian Hieroglyphs was called Medu Neter by the inhabitants of the Nile Valley civilization. They called their country Kemet, not Egypt. Medu Neter is truly the classical language of Africa. Medu Neter is the oldest African Language for which there is a large body of written texts. There are more texts written in Medu Neter than in any other ancient world language. The people of Kemet left an abundance of detailed data which, until recent decades, was only available to Egyptologist, archeologists, anthropologists, museums and a select few scholars and collectors. Now, serious students can learn how to read what the Kemites wrote on papyrus, and on the temple walls. This book, the Writing System of Medu Neter takes the student step by step through the sound and writing system of this beautiful language. Learning Medu Neter may be one of the most interesting experiences that you will ever have.
